

DIPENDRA SHARMA

Frontend Engineer | Looking for Frontend Intern Role

☎ +91 9780111228 | ✉ dipsharmadev@gmail.com | 🌐 github.com/tech-dipesh | 🔗 linkedin.com/in/tech-dipesh

Summary

Frontend engineer who ships fast, accessible interfaces and thinks in component architecture. Picks up new frameworks by building production UIs rather than following tutorials — ramped from zero React knowledge to live deployed apps with public commit history in under three months. Debugs rendering issues from first principles, tracing re-renders through the component tree and profiling bottlenecks instead of guessing. Thrives under constraints, delivering polished frontend experiences on student resources with no hand-holding. Currently deepening expertise in performance optimization, design systems, and advanced React patterns.

Technical Skills

Languages: JavaScript, TypeScript, C++, C, SQL

Frontend: React.js, Next.js, Redux Toolkit, Context API, Tailwind CSS, HTML5/CSS3

Performance & Tools: Code Splitting, Lazy Loading, Debouncing, Pagination, Lighthouse, ESLint, Prettier, Vite, Webpack, Web Vitals

API & Deployment: Axios, REST APIs, JWT, Vercel, Render, GitHub Actions, Git

Projects

Yeti Jobs | [GitHub](#) | [Live](#)

Jan 2026 – Apr 2026

- Production frontend for a job portal using React, JavaScript, Tailwind CSS. Consumes **50+ REST APIs** with custom Axios layer including AbortController for request cancellation and memory cleanup.
- **Role-based UI** (admin, recruiter, job seeker) with dynamic routing and protected routes — served **50+ registered users** with zero auth-state hydration bugs.
- Achieved **Lighthouse 90+** across SEO, Best Practices, and Accessibility; **First Contentful Paint <0.5s** via React.lazy code splitting, debounced search (300ms), and pagination (10 items/page).
- Implemented global state with **Context API** for authentication and user roles, eliminating prop drilling across 15+ components and improving maintainability.
- Integrated **Supabase storage** for resume and profile picture uploads with real-time preview, proper memory cleanup (createObjectURL/revokeObjectURL), and upload progress indicators.
- Built an **AI-powered resume analyser** (OpenAI/Grok) with live score rendering (0–100), ATS feedback display, and complex multi-step form state handling.
- Enforced code quality with ESLint and Prettier; wrote integration tests for critical user flows using Jest.
- **Tech: React, JavaScript, Context API, Tailwind CSS, Axios, Vercel, Supabase, OpenAI, Jest**

State Flow | [GitHub](#) | [Live](#)

Oct 2025 – Jan 2026

- Built Jira-style task manager with drag-and-drop kanban boards using DnD Kit, keyboard navigation support, dark mode toggle with CSS variables, and fully responsive grid layouts across all breakpoints.
- Engineered custom undo/redo system with stack-based state history via React Context API — handles **50+ sequential operations** at O(1) complexity without UI lag or memory bloat.
- Implemented localStorage persistence layer with hydration safety checks and state validation, preventing corruption on browser refresh and maintaining session consistency across tabs.
- Designed analytics dashboards with Chart.js for dynamic data visualization, and built client-side CSV/JSON export with Blob generation and native download triggers — zero server dependency.
- Optimized rendering performance via strategic memoization and ref-based callbacks, maintaining smooth 60fps drag interactions even with 50+ task cards mounted simultaneously.
- **Tech: Next.js, React.js, TypeScript, Context API, Tailwind CSS, DnD Kit, Chart.js, localStorage**

Achievements

- Selected for **GirlScript Summer of Code 2026** — national open-source programme.
- Winner of **CodeaThon 7.0** (university hackathon, cash prize, 120+ participants).
- Solved **313 DSA problems** on LeetCode — 365-Day Badge, 100-Day Badge 2026.
- Active open-source contributor — **20+ GitHub repos, 1000+ commits** (last 12 months).
- **CEED Member** — Entrepreneurship programme, Chitkara University.

Certifications

- **AWS Educate Introduction to Cloud 101** — foundational cloud knowledge.

Education

Chitkara University

Aug 2024 – Expected 2027

Bachelor of Computer Applications (BCA) | *CGPA: 9.44/10*

Himachal Pradesh, India

– Relevant Coursework: DSA, Operating Systems, DBMS, Software Engineering, Computer Networking, Web Performance
