Dipendra Sharma

DevOps & Cloud Engineer | Infrastructure Intern

+91 9780111228 | hello@dipsharma.me | github.com/tech-dipesh | linkedin.com/in/tech-dipesh

Summary

Developer focused on building resilient infrastructure and automation. Strong foundation in Operating Systems, Computer Networking, and Linux. Experienced with Docker, AWS (EC2, S3, IAM), CI/CD, and Linux server administration. I work in the terminal daily using bash, SSH, and cron. I solve problems from first principles, taking ownership end-to-end. Comfortable working under ambiguity and shipping fixes that mitigate risk. Currently learning **Terraform and Kubernetes** to build scalable infrastructure.

Technical Skills

Containerisation: Docker, Alpine Linux, Multi-stage builds, Docker CLI
Cloud & AWS: AWS (EC2, S3, IAM), Nginx, Linux Server Administration, Vercel, Render, Supabase
CI/CD & Automation: GitHub Actions, Cron jobs, Bash scripting, CLI deployments, SSH, SCP
Terminal & Debugging: Connecting, writing code, and debugging entirely from the terminal using SSH, curl, journalctl, tail, grep, ss, netstat
Observability: Redis, Apache Bench, Logging, Jest
Backend & Databases: Node.js, Express, PostgreSQL, MongoDB, Prisma
Languages & Tools: Python, JavaScript, TypeScript, C++, SQL, Git, Linux (Ubuntu), Neovim
Foundational: Kubernetes (Pods, Deployments), Terraform (learning)

Projects

Daigo | GitHub **Aug 2026 – Present**

- Building a real-time marketplace with **Redis pub/sub** for cross-instance WebSocket delivery, **Upstash QStash** for background job processing, and idempotency keys for payment retry safety.
- Designed for containerised deployment with **Docker**, utilising **PostgreSQL + PostGIS** for geospatial data, and CLI-driven environment configuration.
- Implemented failure-resistant backend patterns including atomic seat release on cancellation, revocable JWTs with token rotation, and global error handling.
- ***Tech: Next.js, TypeScript, PostgreSQL + PostGIS, Redis, QStash, Docker (planned)***

Yeti Jobs | GitHub | Live **Jan 2026 – Apr 2026**

- Containerised full-stack app with **Docker multi-stage builds** (Alpine) — cut backend image **74%** and frontend **79%**.
- Deployed on **AWS EC2** (Ubuntu), configuring **Nginx as a reverse proxy** and **Systemd** for high availability and process management.
- Load-tested with **Apache Bench**: **1,000 requests** at **100 concurrent users** → **67 req/sec**, **0 failures**. Optimised PostgreSQL with composite indexing (~**30% faster**) and connection pooling.
- Debugged production issues — **PostgreSQL pool leaks**, container memory spikes. Implemented **cron automation** to sustain **99.5% uptime** over 3 months.
- ***Tech: Docker, GitHub Actions, PostgreSQL, Node.js, Express, AWS EC2, Nginx, Apache Bench, Supabase***

Achievements

- Selected for **GirlScript Summer of Code** 2026 — national open-source programme.
- **313 LeetCode** problems solved | **20+ GitHub repos** | **1000+ commits** (last 12 months).
- Winner of **CodeaThon 7.0** (university hackathon, cash prize, 120+ participants).
- Shortlisted for **Polaris Fellowship** Program 2026.

Certifications

- **AWS Educate Introduction to Cloud 101** — *Provider: AWS* • Server • EC2 • Lambda • S3 • IAM
- **Web Development Masterclass** – *Provider: Udemy* • HTML/CSS • JavaScript • Node.js • REST APIs

Education

Chitkara University **Aug 2024 – Expected 2027**

Bachelor of Computer Applications (BCA) | CGPA: 9.38/10 *Himachal Pradesh, India*

- Coursework: DSA, Operating Systems, Computer Networking, DBMS, Software Engineering, Web Performance
