Dipendra Sharma

Software Intern | Full Stack & Backend

+91 9780111228 | hello@dipsharma.me | github.com/tech-dipesh | linkedin.com/in/tech-dipesh
India | 2027 Batch | Available for Full-Time Internship

Summary

Versatile full-stack developer with **specialization across the stack** and a focus on building things that work in the real world while looking for the internship. I've built and deployed **production systems** using **Node.js, Express, PostgreSQL, React, Docker and AWS**, moving from learning backend fundamentals to shipping applications with limited resources and a public development history. I enjoy understanding how systems work, debugging issues from first principles, and taking ownership from idea to deployment.**I work in the terminal almost every day** using Git Bash on Windows with Unix tools: bash scripting, SSH, file permissions, cron-style tasks, and vim/neovim. I've led teams across SIH, Digimantra, and Nepal Police Hackathon, where collaboration and problem-solving mattered as much as technical skills. Currently Learning **AI Infrastructure, RAG Systems, and Database Internals** to build better full stack engineering systems.

Technical Skills

Languages: JavaScript, TypeScript, C/C++, SQL
Frontend: Next.js, React.js, Redux, Tailwind CSS, HTML5
Backend: Node.js, Go, Express.js, REST APIs, RBAC, Zod, Redis
Databases: PostgreSQL, MongoDB, MySQL, Supabase, Prisma
DevOps & Cloud: Docker, Git, GitHub Actions, AWS (EC2, S3, IAM, SSH), Linux
Concepts: CI/CD, Agile, OOP, Unit Testing, Data Structures & Algorithms

Projects

Yeti Jobs | GitHub | Live **Jan 2026 – Apr 2026**

- Built a full-stack job portal with **50+ REST APIs**, **15,000+ LOC**, RBAC across 3 user roles, **10 normalized PostgreSQL tables**, and React frontend with code splitting, debounced search, and pagination.
- Optimized PostgreSQL with composite indexing ~30% gain with EXPLAIN ANALYZE) and connection pooling for **20 concurrent connections**; integrated Supabase storage and OpenAI/Grok for AI-based resume scoring (0–100 ATS scale).
- Load-tested the backend with Apache Bench (**1,000 reqs** at **100 users** achieving **67 req/sec**, **0 failures**) and wrote **28+ integration tests**, maintaining **99.5% uptime** over 3 months.
- Reduced backend image size by **74%** using multi-stage Docker builds (Alpine). Deployed via **GitHub Actions CI/CD** to **Vercel** (frontend) and **AWS EC2** (backend), configuring **Nginx as a reverse proxy** and implementing rate limiting to mitigate resource abuse.
- ***Tech: PostgreSQL, Node.js, Express, AWS, React, TypeScript, Docker, JWT, GitHub Actions***

Daigo | GitHub **Aug 2026 – Present**

- Building a two-sided marketplace with **role-based auth across 5 tiers**, vehicle verification, and admin workflows, solving **cold-start bootstrapping** with circle matching (college/office domains) and notify-me waitlist.
- Implementing **geospatial route matching** via raw **PostGIS queries** through Prisma `$queryRaw` — detour limits, meeting points (Stadia Maps), and **multi-hop relay matching** (chaining two drivers) as fallback.
- Building **real-time accept flow** with **WebSocket + Redis pub/sub** for cross-instance delivery, first-accept-wins concurrency using **Prisma transactions**, idempotency keys for payment retries, and a **pricing engine** with hard caps checked against rounded values.
- ***Tech: Next.js, TypeScript, Prisma, PostgreSQL + PostGIS, Redis, Stadia Maps, Razorpay***

Achievements

- Selected for **GirlScript Summer of Code** 2026.
- Winner of **CodeaThon 7.0** (cash prize, 120+ participants).
- Team lead at **SIH, Digimantra, and Nepal Police** hackathons built fraud detection using pattern recognition.
- **313 LeetCode** problems solved | **5+ GitHub PR** merged across multiple organizations.
- Shortlisted for **Round 2 – Polaris Fellowship 2026** (selected from thousands across 300+ cities).

Certifications

- **AWS Educate Introduction to Cloud 101** – EC2, S3, IAM fundamentals
- **Claude 101** – Prompt Engineering, Artifacts, Claude Skills

Education

Chitkara University **Aug 2024 – Expected 2027**
Bachelor of Computer Applications (BCA) | ***CGPA: 9.38/10*** *Himachal Pradesh, India*

- Coursework: Data Structures & Algorithms, OOP(Java, C++), Operating Systems, DBMS, Computer Networks
