

DIPENDRA SHARMA

Backend Developer | Looking for Internship

☎ +91 9780111228 | ✉ dipsharmadev@gmail.com | 🌐 github.com/tech-dipesh | 🔗 linkedin.com/in/tech-dipesh

Summary

Backend developer who builds systems that don't break when people use them. I design **50+ REST APIs**, optimise databases (**30% faster**), containerise with Docker (**74% reduction**), and maintain **99.5% uptime** with **67 req/sec** load capacity. Debugged production issues including cold starts (50s → 2s), PostgreSQL pool leaks, and duplicate cron jobs. **313 LeetCode**, **1000+ commits**. I own code from development to deployment to monitoring.

Technical Skills

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Prisma, Jest, Supertest, Zod
Databases: PostgreSQL (indexing, pooling, EXPLAIN ANALYZE), MongoDB, MySQL, Supabase
Languages: JavaScript, TypeScript, C++, SQL
DevOps & Tools: Docker (multi-stage, Alpine), Git, GitHub Actions, Vercel, Render, AWS (EC2, S3, IAM), Linux, Apache Bench
Security & Performance: Rate limiting, Hashing, JWT (15min/7d), query optimisation, load testing

Projects

Yeti Jobs | [GitHub](#) | [Live](#) **Jan 2026 – Apr 2026**

- Built backend with **50+ REST APIs**, JWT + RBAC (admin/recruiter/job seeker), **10 PostgreSQL tables**, **15,000+ lines** of code (5,000 backend). Serves **200+ jobs** and **50+ users**.
- PostgreSQL composite indexing – query time from **7ms to 5ms (30%)**, validated with EXPLAIN ANALYZE. Connection pooling for **20 concurrent DB connections**.
- Load tested with Apache Bench: **1000 requests in 14.9s** at **100 concurrent users** → **67 req/sec**, p95 1929ms, **0 failures**.
- Implemented rate limiting (200 req/min globally, 2/min for password reset), bcrypt (12 rounds), JWT (15min access / 7d refresh).
- Debugged **10+ production issues** – PostgreSQL pool leak, cold start latency (50s → 2s), duplicate cron jobs. Built monitoring scripts to detect failures early.
- Wrote **28+ integration tests** (Jest + Supertest) covering 11 critical API routes. Cron job every 10 minutes – achieved **99.5% uptime** over 3 months.
- Docker multi-stage builds (Alpine): backend from **1.99GB → 520MB (74%)**; frontend from **1.03GB → 220MB (79%)**.
- Integrated 3 external services: Supabase (S3-compatible storage), OpenAI/Grok (AI resume scoring), Nodemailer.
- **Tech: PostgreSQL, Node.js, Express, JavaScript, Docker, JWT, Jest, Supertest, GitHub Actions, Render**

State Flow | [GitHub](#) | [Live](#) **Oct 2025 – Jan 2026**

- Jira-inspired task manager with drag-drop boards, dark mode, keyboard shortcuts. Undo/redo works for **50+ actions** without lag.
- State management with **React Context API** + localStorage persistence, CSV/JSON export.
- **Tech: Next.js, React.js, TypeScript, Context API, Tailwind CSS, DnD Kit, Chart.js, localStorage**

Achievements

- Selected for **GirlScript Summer of Code 2026**.
- Winner of **CodeaThon 7.0** at university level (cash prize, 120+ participants).
- **313 LeetCode** problems solved | **20+ GitHub repos** | **1000+ commits**.
- Shortlisted for **Round 2 – Polaris Fellowship 2026** (selected from thousands across 300+ cities).
- **CEED Member** (Entrepreneurship Program), Chitkara University.

Certifications

- **AWS Educate Introduction to Cloud 101** – Provider: AWS Academy • EC2 • S3 • IAM fundamentals
- **Web Development Masterclass** – Provider: Udemy • HTML/CSS • JavaScript • Node.js • REST APIs

Education

Chitkara University **Aug 2024 – Expected 2027**

Bachelor of Computer Applications (BCA) | CGPA: 9.44/10

Himachal Pradesh, India

- Relevant Coursework: DSA, Operating Systems, DBMS, Software Engineering, REST APIs, Web Performance
