

# DIPENDRA SHARMA

## Software Development Engineer Intern – Backend & Data Structures/Algorithms

Phone: +91 9780111228 | Email: [dipsharmadev@gmail.com](mailto:dipsharmadev@gmail.com) | Portfolio: [dipsharma.me](https://dipsharma.me)  
LinkedIn: [linkedin.com/in/tech-dipesh](https://linkedin.com/in/tech-dipesh) | GitHub: [github.com/tech-dipesh](https://github.com/tech-dipesh) | LeetCode: [leetcode.com/tech-dipesh](https://leetcode.com/tech-dipesh) | Codeforces: [codeforces.com/dipeshnoobs](https://codeforces.com/dipeshnoobs)

### Summary

Problem-solving CS student able to simplify complex issues – **solved 313 LeetCode problems** (70.23% acceptance rate, 365-Day Badge). This problem-solving skill used in production: **more than 50 REST APIs**, **30% faster** database queries, **74% reduced** size of Docker containers, and **99.5% availability** (load tested at **67 requests/second**, **zero downtime**). I have some knowledge of system design principles such as **auto-scaling**, **latency**, **scalability**, **CDN**, and distributed systems. Managed teams of 3-4 people during hackathons for developing OCR data cleansing software and pattern recognition-based fraud investigation tools. Able to think clearly and quickly adapt in Agile teams.

### Data Structures, Algorithms & Problem Solving

- **313 Problems Solved:** Arrays, Strings, Hash Tables, Two Pointers, Sliding Window, Binary Search, Linked Lists, Stacks/Queues, Trees, Graphs, Heaps, Sorting, Recursion. **Advanced:** DP (30), Divide & Conquer (17), Backtracking (13), Greedy.
- **Consistency & Depth:** 365-Day Badge, 100-Day Badge 2026, 361 active days, 130-day max streak, 599 submissions in past year. Comfortable reasoning about Big-O tradeoffs and choosing the right data structure under time pressure.

### Technical Skills

**Languages:** C++ (primary), JavaScript, TypeScript, SQL, C, Bash

**DSA & Problem Solving:** Arrays, Trees, Graphs, Heaps, DP, Greedy, Backtracking, Two Pointers, Sliding Window, Binary Search

**Backend & System Design:** Node.js, Express, REST APIs, JWT, RBAC, PostgreSQL, Prisma, MongoDB, (familiar with: auto scaling, scalability, CDN, latency optimization)

**Frontend:** React, Next.js, TypeScript, Redux, Context API, Tailwind CSS

**DevOps & Cloud:** Docker, Git, GitHub Actions, AWS (EC2/S3/IAM – top-level), Vercel, Render, Linux

### Projects

**Yeti Jobs** | [Github](#) | [Live](#)

Jan 2026 – Apr 2026

- Designed **50+ REST APIs** with RBAC (admin/recruiter/job-seeker), **10 PostgreSQL tables**, serving **200+ jobs** and **50+ users**.
- Cut query time **30%** (7ms → 5ms) with composite indexing (EXPLAIN ANALYZE); connection pooling for **20 concurrent DB connections**.
- Load tested: **1,000 requests in 14.9s** at 100 concurrent users → **67 req/sec**, p95 1,929ms, **0 failures**.
- Multi-stage Docker builds: backend **1.99GB** → **520MB**, frontend **1.03GB** → **220MB** (avg. **76% smaller**).
- 28+ integration tests (Jest + Supertest); cron job cut cold starts from **50+ sec to <2s**, sustaining **99.5% uptime** over 3 months.
- **Tech:** PostgreSQL, Node.js, Express, React, JavaScript, Docker, JWT, GitHub Actions

**State Flow** | [Github](#) | [Live](#)

Oct 2025 – Jan 2026

- Jira-style SPA with drag-and-drop boards, dark mode, keyboard shortcuts; custom undo/redo data structure (past/present/future stacks) handling **50+ operations** without lag.
- Persisted state via React Context API + localStorage; CSV/JSON export.
- **Tech:** Next.js, TypeScript, React.js, Context API, Tailwind CSS, DnD Kit, Chart.js

### Achievements

- **313 LeetCode problems** solved – 365-Day Badge, 100-Day Badge 2026.
- Led multiple hackathon teams of 3-4 members – built OCR-based data cleaning apps, fraud investigation systems using pattern recognition, and shipped working prototypes under 24-hour deadlines.
- Selected Contributor – **GirlScript Summer of Code 2026**.
- Winner – **CodeaThon 7.0** (cash prize, 120+ participants).
- Active open-source contributor – **20+ GitHub repos**, **400+ commits**.
- **CEED Member** – Entrepreneurship Program, Chitkara University.
- **AWS Educate** – EC2, S3, IAM fundamentals.

### Education

**Chitkara University**

*Bachelor of Computer Applications (BCA)*

Aug 2024 – Expected 2027

**CGPA: 9.44/10**

- Coursework: DSA, Operating Systems, DBMS, Software Engineering, REST APIs, Web Performance
