

DIPENDRA SHARMA

Full Stack / Software Engineer Intern | Looking For Internship

☎ +91 9780111228 | ✉ dipsharmadev@gmail.com | 🌐 github.com/tech-dipesh | 🔗 linkedin.com/in/tech-dipesh

Summary

Full-stack developer, working primarily in the **PERN stack**. Built and shipped Yeti Jobs, a production ready jobs portal, with **50+ REST API's**, JWT authentication based on user role and 15,000+ lines of code. While i'm comfortable across the stack, I lean toward in **backend engineering** designing API's, optimizing queries, testing the load, and developing robust systems for performance beyond localhost. My experience spans team leadership in various hackathons, developing applications from OCR-based data cleaning to systems for conducting fraudulent activities investigation, which connect similar cases using pattern recognition. Currently exploring system design, **Redis**, caching, load balancing, and distributed systems.

Technical Skills

Frontend: React.js, Next.js, TypeScript, Redux, Context API, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Zod, Jest, Supertest

Databases: PostgreSQL, MongoDB, MySQL, Supabase, Prisma

DevOps & Cloud: Docker, Git, GitHub Actions, Vercel, Render, AWS (EC2, S3, IAM), Linux, Apache Bench

Projects

Yeti Jobs | GitHub | Live

Jan 2026 – Apr 2026

- Full-stack job portal: **50+ REST APIs**, JWT + with Designed RBAC authorization to isolate recruiter, admin, and candidate workflows.), **10 normalized PostgreSQL tables**, **15,000+ lines** of code (5,000 backend).
- PostgreSQL composite indexing – query time from **7ms to 5ms (30%)**, validated with EXPLAIN ANALYZE. Connection pooling for **20 concurrent DB connections**.
- Load testing with Apache Bench: **1000 requests in 14.9s** at **100 concurrent users** → **67 req/sec**, p95 latency 1929ms, **0 failures** with single free-tier Render instance.
- Frontend: **React + JavaScript**, Context API for global auth, role-based UI, **React.lazy** code splitting, **debounced search (300ms)**, pagination.
- Performance: Lighthouse 90+ across SEO, Best Practices, and Accessibility; FCP <0.5s; multi-stage Docker builds cut image size by 74% (backend) and 79% (frontend); cron job every 5 minutes eliminates cold starts (50+ sec → <2s), sustaining 99.5% uptime over 3 months.
- Integrated **Supabase** for file storage and **OpenAI/Grok** for AI-based resume scoring (0–100 scale ATS feedback).
- Introduced multi-stage builds to reduce deployment artifacts and cold-start overhead with cut image size by **74% (backend)** and **79% (frontend)**, reducing deploy time and cold-start footprint.
- Deployed via **Vercel** (frontend) and **Render** (backend) with **GitHub Actions** CI/CD for automated for keep up Server. Integrate Express in build Rate Limiter for Abuse of Excessive Resources.

Tech: *PostgreSQL, Node.js, Express, React, JavaScript, Docker, JWT, Jest, Supertest, GitHub Actions*

State Flow | GitHub | Live

Oct 2025 – Jan 2026

- Jira-inspired task management SPA: drag-drop boards, dark mode, keyboard shortcuts, fully responsive.
- State management with **React Context API** + localStorage persistence. Undo/redo works for **50+ operations** without lag.
- Analytics dashboards (Chart.js) and CSV/JSON export.
- Tech:** *Next.js, React.js, TypeScript, Context API, Tailwind CSS, DnD Kit, Chart.js, localStorage*

Achievements

- Selected for **GirlScript Summer of Code 2026**.
- Winner of **CodeaThon 7.0** at university level (cash prize).
- 250+ LeetCode** problems solved | **50+ github repos** | **1200+ commits** (last 12 months).
- Shortlisted for **Round 2 – Polaris Fellowship 2026** (selected from thousands across 300+ cities).
- CEED Member** (Entrepreneurship Program), Chitkara University.

Certifications

- AWS Educate Introduction to Cloud 101** – Provider: *AWS Academy* • EC2 • S3 • IAM fundamentals
- Web Development Masterclass** – Provider: *Udemy* • HTML/CSS • JavaScript • Node.js • REST APIs

Education

Chitkara University

Bachelor of Computer Applications (BCA)

Aug 2024 – Expected 2027

CGPA: 9.44/10

- Coursework: DSA, Operating Systems, DBMS, Software Engineering, REST APIs, Web Performance
