

DIPENDRA SHARMA

Backend Developer | Looking for Internship

☎ +91 9780111228 | ✉ dipsharmadev@gmail.com | 🌐 github.com/tech-dipesh | 🔗 linkedin.com/in/tech-dipesh

Summary

Backend developer who turns personal projects into production-ready systems. Design REST APIs that are clean, consistent, and secure. Solve problems by breaking them down – 250+ LeetCode problems taught me how to think before coding. Deployed real applications using Docker, Render, and Vercel, learning what works (and what breaks) along the way. Comfortable with the PERN stack, but focused on the backend: PostgreSQL, Express, and Node.js.

Technical Skills

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Prisma, Jest, Supertest
Databases: PostgreSQL, MongoDB, MySQL, Prisma, Supabase
Languages: JavaScript, TypeScript, C++, SQL
DevOps & Tools: Docker, Git, Vercel, Render, AWS (EC2, S3, IAM), Linux, Apache Bench
Security & Performance: Rate limiting, bcrypt, JWT, query optimisation, load testing

Projects

Yeti Jobs | [GitHub](#) | [Live](#)

Jan 2026 – Apr 2026

- A backend with **50+ REST APIs**, JWT role access (admin, recruiter, job seeker), **9 PostgreSQL tables**, and about **15,000 lines** of full-stack code (5,000 backend).
- PostgreSQL composite indexes reduced query time from **7ms to 5ms (30% faster)** – verified with EXPLAIN ANALYZE.
- Load tests with Apache Bench: **1000 requests in 14.9 seconds at 100 concurrent users** (67 requests/sec, p95 latency 1929ms, **0 failed requests**).
- Rate limiting (200 req/min globally, 2/min for password reset), bcrypt (12 rounds), and JWT (15min access / 7 days refresh).
- **28+ integration tests** covering **11 critical API routes** using Jest and Supertest. A cron job pings the server every 10 minutes – cold start reduced from **50+ seconds to under 2 seconds**, achieving **99.5% uptime** over three months.
- Docker multi-stage builds with Alpine Linux: backend image from **1.99GB to 520MB (74% reduction)**; frontend from **1.03GB to 220MB (79% reduction)**.
- Three external services integrated: Supabase (file storage), OpenAI/Grok (AI resume scoring), Nodemailer (emails). Connection pooling for **20 concurrent database connections**.
- Deployed on Render – backend handles **67 requests per second** under peak load with zero failures.
- **Tech:** *PostgreSQL, Node.js, Express, TypeScript, Docker, JWT, Jest, Supertest, GitHub Actions, Render*

State Flow | [GitHub](#) | [Live](#)

Oct 2025 – Jan 2026

- A Jira-like task manager with drag-drop boards, dark mode, and localStorage. Undo/redo works for **50+ actions** without lag.
- Responsive UI built with Tailwind CSS.
- **Tech:** *React.js, JavaScript, Context API, Tailwind CSS, DnD Kit, Chart.js, localStorage*

Achievements

- Selected for **GirlScript Summer of Code 2026**.
- Winner of **CodeaThon 7.0** at university level (cash prize).
- Solved **250+ DSA problems** on LeetCode.
- Active open-source contributor – **20+ GitHub repositories** and **400+ commits**.
- **CEED Member** in Entrepreneurship Program at Chitkara University.

Certifications

- **AWS Educate Introduction to Cloud 101** – basics of EC2, S3, and IAM.

Education

Chitkara University

Aug 2024 – Expected 2027

Bachelor of Computer Applications (BCA)

Himachal Pradesh, India

- CGPA: 9.44
- Courses: DSA, Operating Systems, DBMS, Software Engineering, REST APIs, Web Performance
