

DIPENDRA SHARMA

Backend Developer | Building Scalable & Optimized Systems

☎ +91 9780111228 | ✉ dipsharmadev@gmail.com | 🌐 github.com/tech-dipesh | 💼 linkedin.com/in/tech-dipesh

Summary

Backend-focused developer with a bias for shipping systems that survive real traffic. Picks up new stacks by building production backends rather than following tutorials — ramped from zero to live deployed APIs with public commit history in under three months. Debugs from first principles, tracing root causes through database behavior and system logs instead of patching symptoms. Thrives under constraints, delivering working backend systems on student resources with no hand-holding. Currently deepening expertise in system design, Redis, caching strategies, and distributed systems.

Technical Skills

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Prisma, Bun, Zod
Databases: PostgreSQL (indexing, pooling, EXPLAIN ANALYZE), MongoDB, MySQL, Supabase
Languages: JavaScript, TypeScript, SQL
DevOps & Tools: Docker, Git, GitHub Actions, AWS (EC2, S3, IAM), Linux, Apache Bench
Security & Performance: Rate limiting, Hashing, JWT, query optimisation, load testing, Input Validation

Projects

Yeti Jobs | [GitHub](#) | [Live](#)

Jan 2026 – Apr 2026

- Architected **50+ REST APIs** with RBAC across 3 user roles and **10 normalized PostgreSQL tables**. Implemented defense-in-depth security: JWT, bcrypt, and rate limiting (**200 req/min** global, 2/min for sensitive routes).
- Optimized PostgreSQL with composite indexing — query time dropped **30%** (7ms → 5ms) per EXPLAIN ANALYZE. Managed connection pooling for **20 concurrent DB connections**.
- Load-tested with Apache Bench: **5,000 requests at 100 concurrent users** → **97 req/sec** peak, p95 < **460ms**, **0 failures**. Identified and fixed connection pooling bottlenecks under burst traffic.
- Debugged **10+ production issues** including PostgreSQL pool leaks, cold start latency (**50s** → **2s**), and duplicate cron jobs. Built monitoring scripts to catch failures before they cascade.
- Wrote **28+ integration tests** (Jest + Supertest) covering 11 critical API routes. Cron job every 10 minutes eliminated cold starts, sustaining **99.5% uptime** over 3 months.
- Multi-stage Docker builds (Alpine) reduced backend image from **1.99GB** → **520MB (74%)**. Deployed via Render with GitHub Actions CI/CD pipeline.
- Tech:** *PostgreSQL, Node.js, Express, JavaScript, Docker, JWT, Jest, Supertest, GitHub Actions, Render*

Mega Project Listing | [GitHub](#) | [Live](#)

Dec 2024 – Feb 2025

- Architected **MVC backend** with session-based auth — Passport.js, salted+bcrypt hashing, MongoDB-backed session store (connect-mongo), and owner-only middleware on thin Express route layers.
- Built image upload pipeline integrating **Cloudinary** — **multer** handles multipart parsing, Cloudinary stores and transforms assets, and database references serve optimized URLs without local file bloat.
- Designed geospatial data flow with MapTiler API — forward geocoding converts addresses to GeoJSON Point coordinates, persisted in **MongoDB**, and rendered via interactive map markers.
- Deployed on Render with production-aware configuration — eliminated MemoryStore leak risks by switching to connect-mongo, pinned Node 22 runtime, and isolated cloud service credentials via environment variables.
- Tech:** *Node.js, Express, MongoDB, Mongoose, Passport.js, Cloudinary, MapTiler, EJS, Render*

Achievements

- Selected for **GirlScript Summer of Code 2026**.
- Winner of **CodeaThon 7.0** at university level (cash prize, 120+ participants).
- 313 LeetCode** problems solved | **20+ GitHub repos** | **1000+ commits**.
- Shortlisted for **Round 2 – Polaris Fellowship 2026** (selected from thousands across 300+ cities).
- CEED Member** (Entrepreneurship Program), Chitkara University.

Certifications

- AWS Educate Introduction to Cloud 101** – Provider: AWS Academy • EC2 • S3 • IAM fundamentals
- Web Development Masterclass** – Provider: Udemy • HTML/CSS • JavaScript • Node.js • REST APIs

Education

Chitkara University

Aug 2024 – Expected 2027

Bachelor of Computer Applications (BCA) | CGPA: 9.44/10

Himachal Pradesh, India

- Relevant Coursework: DSA, Operating Systems, DBMS, Software Engineering, Computer Networking, Web Performance
