Dipendra Sharma

Software Development Engineer Intern | Algorithms & Backend

Phone: +91 9780111228 | Email: hello@dipsharma.me
Linkedin | Github | Leetcode

Summary

Computer Science student with strong foundations in Data Structures and Algorithms, Operating Systems, Database Management Systems, Computer Networks, and Object-Oriented Programming. Achieved a peak LeetCode rating of **1570**, solved 313+ problems, and earned the 500-Day Badge through consistent problem-solving. I've Secured **1st Place** at University Code-a-Thon 7.0, competing against 120+ participants. With Experienced in solving problems across **Arrays**, Strings, Hash Tables, Two Pointers, Sliding Window, Binary Search, Linked Lists, Stacks, Queues, Trees, Graphs, and Greedy Algorithms. I always try to Focus on understanding problem constraints, identifying optimal approaches, and analyzing **time and space complexity** before implementation. Strong interest in algorithmic problem-solving, efficient software design, and understanding how systems work internally.

Competitive Programming & Problem Solving

LeetCode: Peak Rating **1570** | **313+ problems solved** | **500-Day Badge** | 3+ contests
Patterns Mastered: Kadane's, Two-Pointer, Sliding Window, Binary Search on Answer, Dutch National Flag, Prefix Sum, Hash Map Counting, Monotonic Stack, Fast/Slow Pointers
Approach: Analyze time/space complexity first | target O(N) or O(log N) after brute force | iterate to optimal

Technical Skills

Languages: C, C++, Java, JavaScript, TypeScript, SQL
Core CS: **OS** (Processes, Threads, Scheduling, Memory), **DBMS** (Normalization, ACID, Indexing, Transactions), **CN** (TCP/UDP, HTTP, DNS), **OOP** (Polymorphism, Inheritance, Encapsulation, Abstraction)
Linux: Kernel fundamentals, systemd, cron, SSH, bash scripting, log analysis, networking tools (ss, netstat)
Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, PostgreSQL, Prisma, MongoDB
Frontend: React, Next.js, TypeScript, Redux, Tailwind CSS
DevOps: Docker, Git, GitHub Actions, AWS (EC2, S3, IAM)

Projects

Daigo | GitHub **Aug 2026 – Present**

- Engineered **multi-hop relay matching** using graph pathfinding, chaining two drivers through a single transfer point to optimize route coverage and minimize detours.
- Implemented geospatial route matching using **raw PostGIS queries** (via Prisma `$queryRaw`) and indexed spatial data to enforce detour limits and calculate suggested meeting points.
- Built concurrency-safe real-time accept flows using **Prisma transactions** to prevent race conditions in first-accept-wins driver matching; implemented Redis pub/sub for distributed WebSocket delivery.

Tech: Next.js, TypeScript, PostgreSQL + PostGIS, Prisma, Redis, Stadia Maps

Yeti Jobs | GitHub | Live **Jan 2026 – Apr 2026**

- Built **50+ REST APIs** with role-based access control (RBAC), enforcing granular permissions across admin, recruiter, and candidate workflows through centralized authorization middleware.
- Optimized PostgreSQL via composite indexing (tree-structured search), cutting query time **30%** (7ms → 5ms per EXPLAIN ANALYZE); connection pooling handled **20 concurrent DB connections**.
- Load-tested with Apache Bench: **1,000 requests** at **100 concurrent users → 67 req/sec**, p95 **1,929ms**.
- Multi-stage Docker builds reduced image size by **76%**; cron job eliminated cold starts (**50s → <2s**), sustaining **99.5% uptime** over 3 months. Deployed via GitHub Actions CI/CD.

Tech: PostgreSQL, AWS EC2, Node.js, Express, React, TypeScript, Docker, JWT, Jest, GitHub Actions

Achievements

— **CodeaThon 7.0 Winner** — solved 4/5 algorithm questions, 1st place (cash prize, 120+ participants).
— LeetCode peak rating **1570** — 313 problems solved, 500-Day Badge, 100-Day Badge 2026.
— Selected Contributor — **GirlScript Summer of Code** 2026 (open-source).
— Led multiple hackathon teams of 3-6 (SIH, Digimantra, Nepal Police) — shipped prototypes under 24-hour deadlines.
— **GitHub**: 2000+ commits (last 12 months) | **5+ merged PRs** including **Zed editor** contributions.
— **CEED Member** — Entrepreneurship Program, Chitkara University.

Certifications

— **AWS Educate Introduction to Cloud 101** — EC2, S3, IAM fundamentals
— **C++ Code Like You Are in MATRIX** — Memory Management, Data Structures, Algorithms

Education

Chitkara University **Aug 2024 – Expected 2027**
Bachelor of Computer Applications (BCA) ***CGPA: 9.38/10***
– Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Software Engineering
