Projects

State Flow | GitHub | Live **Oct 2025 – Jan 2026**

- Built a Jira-style task manager using **Next.js App Router**, TypeScript, and reusable component architecture, achieving Lighthouse **100 SEO** and **92 Accessibility**.
- Engineered drag-and-drop Kanban boards with DnD Kit, keyboard navigation, dark mode using CSS variables, and responsive layouts.
- Implemented a custom undo/redo system with stack-based state history using **React Context API**, supporting **50+ sequential operations** with localStorage persistence and hydration safety.
- Designed analytics dashboards with Chart.js and client-side CSV/JSON exports using Blob generation.
- ***Tech: Next.js, React.js, TypeScript, Context API, Tailwind CSS, DnD Kit, Chart.js***

Yeti Jobs | GitHub | Live **Jan 2026 – Apr 2026**

- Developed a production React frontend consuming **50+ REST APIs**, with a custom Axios layer and **AbortController** for stale-request cancellation and graceful backend cold-start handling.
- Built role-based interfaces for admin, recruiter, and job seeker workflows with dynamic routing and protected routes, serving **50+ registered users**.
- Achieved **Lighthouse 100 SEO, 92 Accessibility, and 92 Best Practices**, with **First Contentful Paint under 0.5s** through React.lazy, code splitting, debounced search, and pagination.
- Implemented global state management using **Context API**, reducing prop drilling across 15+ components, with Suspense and Error Boundaries for resilient UI states.
- Integrated file uploads with real-time previews, object URL cleanup, and progress indicators. Built an AI resume analyzer interface with live score rendering.
- ***Tech: React, JavaScript, Context API, Tailwind CSS, Axios, EC2, Vercel, Supabase, Jest***
