

DIPENDRA SHARMA

Software Intern | Full Stack & Backend

+91 9780111228 | hello@dipsharma.me | github.com/tech-dipesh | linkedin.com/in/tech-dipesh
India | 2027 Batch | Available for Full-Time Internship

Summary

Full-stack developer with a **backend specialization** and a focus on building things that work in the real world with looking for the internship. I've built and deployed **production systems** using **Node.js, Express, PostgreSQL, React, and Docker**, moving from learning backend fundamentals to shipping live applications with limited resources and a public development history. I enjoy understanding how systems work internally, debugging issues from first principles, and taking ownership from idea to deployment. **I work in the terminal almost every day** — using Git Bash on Windows with Unix tools: bash scripting, SSH, file permissions, cron-style tasks, and vim/neovim. I've led teams across SIH, Digimantra, and Nepal Police Hackathon, where collaboration and problem-solving mattered as much as technical skills. Currently exploring **AI Infrastructure, RAG Systems, and Database Internals** to build better full stack engineering systems.

Technical Skills

Languages: JavaScript, TypeScript, C/C++, SQL

Frontend: Next.js, React.js, Redux, Tailwind CSS, HTML5

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Zod, Jest

Databases: PostgreSQL, MongoDB, MySQL, Supabase, Prisma

DevOps & Cloud: Docker, Git, GitHub Actions, Render, AWS (EC2, S3, IAM), Linux

Concepts: CI/CD, Agile, OOP, Unit Testing, Data Structures & Algorithms

Projects

Yeti Jobs | [GitHub](#) | [Live](#)

Jan 2026 – Apr 2026

- Built a full-stack job portal with **50+ REST APIs, 15,000+ LOC**, RBAC across 3 user roles, **10 normalized PostgreSQL tables**, and React frontend with code splitting, debounced search, and pagination.
- Optimized PostgreSQL with composite indexing (~30% gain with EXPLAIN ANALYZE) and connection pooling for **20 concurrent connections**; integrated Supabase storage and OpenAI/Grok for AI-based resume scoring (0–100 ATS scale).
- Load-tested with Apache Bench: **1,000 requests at 100 concurrent users → 67 req/sec, p95 latency 1,929ms, 0 failures** on a single free-tier Render instance.
- Wrote **28+ integration tests** (Jest + Supertest) covering 11 critical routes. Cron job every 10 minutes eliminated cold starts (**50s → 2s**), sustaining **99.5% uptime** over 3 months.
- Multi-stage Docker builds (Alpine) reduced backend image by **74% (1.99GB → 520MB)**. Deployed via **GitHub Actions CI/CD** to Vercel (frontend) and Render (backend); implemented rate limiting to **mitigate** resource abuse.
- **Tech: PostgreSQL, Node.js, Express, React, TypeScript, Docker, JWT, GitHub Actions**

Daigo | [GitHub](#)

Aug 2026 – Present

- Currently Building a two-sided real-time **commute marketplace** with role-based auth (rider, driver, admin), vehicle registration with document verification, and admin moderation workflows.
- Solving cold-start bootstrapping with circle-based matching and a notify-me waitlist.
- Implementing geospatial route matching using raw **PostGIS queries** via Prisma `$queryRaw`, detour limits and suggested meeting points, with multi-hop relay matching (chaining two drivers) as fallback.
- Building real-time acceptance system using **WebSocket + Redis pub/sub** for cross-instance delivery — countdown window, first-accept-wins concurrency with **Prisma transactions**, and driver alerts.
- Applied **idempotency keys** for payment retries, webhook verification for Razorpay mock, atomic seat release, refresh token rotation with revocation, and **background jobs** via Upstash QStash.
- **Tech: Next.js, TypeScript, Prisma, PostgreSQL + PostGIS, Redis, QStash, Stadia Maps, Razorpay**

Achievements

- Selected for **GirlScript Summer of Code 2026**.
- Winner of **CodeaThon 7.0** (cash prize, 120+ participants).
- Team lead at **SIH, Digimantra, and Nepal Police** hackathons built fraud detection using pattern recognition.
- **313 LeetCode** problems solved | **5+ GitHub PR** merged across multiple organizations.
- Shortlisted for **Round 2 – Polaris Fellowship 2026** (selected from thousands across 300+ cities).

Certifications

- **AWS Educate Introduction to Cloud 101** – EC2, S3, IAM fundamentals
- **Claude 101** – Prompt Engineering, Artifacts, Claude Skills

Education

Chitkara University

Aug 2024 – Expected 2027

Bachelor of Computer Applications (BCA) | CGPA: 9.38/10

Himachal Pradesh, India

- Coursework: Data Structures & Algorithms, OOP(Java, C++), Operating Systems, DBMS, Computer Networks
