

DIPENDRA SHARMA

DevOps & Cloud Engineer | Infrastructure Intern

☎ +91 9780111228 | ✉ dipsharmadev@gmail.com | 🌐 github.com/tech-dipesh | 🔗 [linkedin.com/in/tech-dipesh](https://www.linkedin.com/in/tech-dipesh)

Summary

DevOps engineer focused on containerisation, CI/CD automation, cloud infrastructure, and system reliability. Experience with **Docker** (reduced image sizes 74–79%), **CI/CD pipelines** (GitHub Actions), **AWS** (EC2, S3, IAM), and **Linux server administration**. Built production backends (**50+ APIs**, **67 req/sec** load capacity) and automated uptime with cron jobs (**99.5%** over 3 months). Debugged **10+ production issues** including cold starts (50s → 2s), PostgreSQL pool leaks, and duplicate cron jobs. **313 LeetCode**, **1000+ commits**. Comfortable with and deployment platforms (Vercel, Render).

Technical Skills

Containerisation & Orchestration: Docker, Docker Compose, Multi-stage builds, Alpine Linux

CI/CD & Automation: GitHub Actions, Cron jobs, Vercel, Render

Cloud Platforms: AWS (EC2, S3, IAM), Vercel, Render, Supabase

Observability & Queues: Redis, BullMQ, Logging basics, Apache Bench (load testing)

Backend & Databases: Node.js, Express, PostgreSQL, MySQL, MongoDB, Prisma

Languages & Tools: JavaScript, TypeScript, C++, SQL, Git, Linux, Neovim

Projects

Yeti Jobs | [GitHub](#) | [Live](#)

Jan 2026 – Apr 2026

- Architected full-stack application with **50+ REST APIs**, PostgreSQL, and React. Containerised backend and frontend using **Docker multi-stage builds with Alpine Linux** – reduced backend image from **1.99GB to 520MB (74%)** and frontend from **1.03GB to 220MB (79%)**.
- Implemented a **cron job** (every 10 minutes) to prevent cold starts on Render – reduced startup latency from **50+ seconds to under 2 seconds**, achieving **99.5% uptime** over three months.
- Load-tested backend using **Apache Bench**: handled **1000 requests in 14.9s** with **100 concurrent users** (67 requests/sec, p95 latency 1929ms, **0 failures**).
- Optimised PostgreSQL with **composite indexing** – query time improved by **30%** (7ms → 5ms). Configured connection pooling for **20 concurrent database connections**.
- Debugged **10+ production issues** – PostgreSQL pool leak, cold start latency (50s → 2s), duplicate cron job executions. Built monitoring scripts to detect failures early.
- Integrated **Supabase** (S3-compatible storage) for file uploads and **OpenAI/Grok** for AI scoring.
- Wrote **28+ integration tests** (Jest + Supertest) covering 11 critical API routes.
- **Tech:** *Docker, GitHub Actions, PostgreSQL, Node.js, Express, React, Render, Vercel, Apache Bench*

RuntimeX | [GitHub](#)

May 2026 – Present

- Building an **observability pipeline** for event ingestion and async processing using Express, TypeScript, Prisma, and **BullMQ with Redis**.
- **Tech:** *Node.js, TypeScript, Express, PostgreSQL, Redis, BullMQ, Prisma, Docker, S3 (planned)*

Achievements

- Selected for **GirlScript Summer of Code 2026** – national open-source programme.
- Winner of **CodeaThon 7.0** (university hackathon, cash prize, 120+ participants).
- Solved **313 LeetCode** problems | **20+ GitHub repos** | **1000+ commits**.
- Shortlisted for **Round 2 – Polaris Fellowship 2026** (selected from thousands across 300+ cities).
- **CEED Member** – Entrepreneurship programme, Chitkara University (leadership and product mindset).

Certifications

- **AWS Educate Introduction to Cloud 101** – foundational knowledge of EC2, S3, IAM, and cloud deployment.

Education

Chitkara University

Aug 2024 – Expected 2027

Bachelor of Computer Applications (BCA)

Himachal Pradesh, India

- CGPA: 9.44
- Relevant Coursework: Cloud Computing Fundamentals, Operating Systems, Database Management Systems, Software Engineering, Data Structures & Algorithms, REST APIs
