Dipendra Sharma

AI Engineer / Software Engineer Intern | Building with LLMs

+91 9780111228 | hello@dipsharma.me | github.com/tech-dipesh | linkedin.com/in/tech-dipesh

Summary

Aspiring **AI Engineer** with a strong foundation in **backend systems** and hands-on experience building AI-powered applications. Implemented **OpenAI** and **Grok** in production flows for resume processing, documents processing, and feedback generation, and automated. Expertise in all stages of AI product creation from data ingestion and prompt engineering up to API integration, evaluation, **deployment**, and monitoring. Analyzes problems using **first-principles thinking** and understands their nature through investigation of system behavior, logs, and models output. Skilled in creating robust backend systems, designing APIs, and working with structured data, providing a great basis for creating robust AI systems. Learning deeply about **LLMs**, **RAG systems**, **vector search**, **agentic frameworks system design**, **distributed systems**, **observability**, and **AI infrastructure**.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL
AI & LLMs: RAG, LLMOps, OpenAI API, Prompt Engineering, LangChain, LlamaIndex, Agentic Frameworks
Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Zod, Jest, Supertest
Databases: PostgreSQL, MongoDB, Supabase, Prisma
DevOps & Tools: Docker, Git, GitHub Actions, Vercel, Render, AWS (EC2, S3, IAM), Linux

AI Projects

Yeti Jobs | GitHub | Live **Jan 2026 – Apr 2026**

- Built an **AI-powered resume analyzer** using OpenAI/Grok — users upload a PDF resume, the system extracts text via `pdf-parse`, sends it to the LLM, and returns a **score (0–100)** with **actionable ATS feedback** (missing keywords, formatting issues, skill gaps).
- Integrated the feature into a full-stack job portal with **50+ REST APIs**, **JWT + RBAC**, and **10 PostgreSQL tables**. Optimized database queries (**30% faster**) and containerized with Docker (**74% image reduction**).
- Load-tested backend to **67 req/sec** with **0 failures**; maintained **99.5% uptime** over 3 months via cron-based automation.
- ***Tech: OpenAI/Grok, pdf-parse, Node.js, Express, PostgreSQL, React, Docker, JWT***

Chayan (In Progress) | GitHub **Oct 2026 – Present**

- Building a **Python-based RAG system** that profiles each PDF and tests **12 chunking × retrieval combinations** to find the winning strategy per document — instead of blindly trusting one setting.
- Implemented **4 chunkers** (fixed, recursive, heading-aware, table-aware) and **3 retrievers** (dense embeddings, BM25, hybrid RRF), scored via **hit@k and MRR** on questions generated from page text — not chunks, so no chunker gets an unfair edge.
- Adding **rule-based failure labels** (e.g., "answer split across chunks") and a chat interface over the winning config with source pages shown.
- ***Tech: Python, uv, OpenAI Embeddings, BM25, Hybrid RRF, Streamlit (planned)***

Achievements

- Built an **AI-powered fraud detection system** at a Nepal Police hackathon — used pattern recognition to connect similar cases and identify fraudulent activities (team lead, 24-hour deadline).
- Selected for **GirlScript Summer of Code** 2026.
- Winner of **CodeaThon 7.0** (cash prize, 120+ participants).
- **313 LeetCode** problems solved | **20+ GitHub repos** | **1000+ commits**.
- Shortlisted for **Round 2 – Polaris Fellowship 2026** (selected from thousands across 300+ cities).
- **CEED Member** (Entrepreneurship Program), Chitkara University.

Certifications

- **AWS Educate Introduction to Cloud 101** – EC2, S3, IAM fundamentals
- **Claude 101** – Prompt Engineering, Artifcats, Claude Skills

Education

Chitkara University **Aug 2024 – Expected 2027**

Bachelor of Computer Applications (BCA) | CGPA: 9.44/10 *Himachal Pradesh, India*

- Coursework: DSA, Operating Systems, DBMS, Software Engineering, Computer Networking
